Dear Sir:

This confirms the telephone interview with Examiner Melba Bumgarner on September 15, 2006 in connection with the above application and the related pending application of Serial No. 10/356,735.

During this interview, independent claim 1 and the prior art reference to Chalifoux Patent No. 5,458,488 were discussed. Pursuant to this discussion, it was agreed that incorporation of the subject matter of dependent claim 91 requiring the impression cap to be selectively connectable to the dental implant solely by the press fit connection into independent claim 1 would overcome the Chalifoux reference and place independent claim 1, and thus its respective dependent claims in condition for allowance. This amendment, together with the cancellation of claim 91, was agreed to by the undersigned and was reflected in the Examiner's Amendment accompanying the Notice of Allowance.

The indefiniteness of the language in claim 59, line 15 was also discussed. The undersigned agreed to the changes for claim 59 set forth in the Examiner's Amendment accompanying the Notice of Allowance.

The application of Serial No. 10/356,735 was not discussed substantively during this interview.

It is respectfully requested that these comments regarding the telephone interview of September 15, 2006 be made of record in the present application.

Respectfully submitted,
